

WHAT IS CLAIMED IS:

- 5
1. A method of distributing multimedia data to remote clients, comprising:
receiving a request for data from a client;
transmitting an applet to the client, said applet being transmitted in
compressed form;
launching the applet on the client;
receiving client-specific parameters from the applet on the client; and
sending multimedia data to the client according to the client-specific
paramters.
- 10
2. The method of distributing multimedia data according to Claim 1,
wherein said client-specific parameters include processing capabilities of the client.
- 15
3. The method of distributing multimedia data according to Claim 2,
wherein said sending multimedia data is at a rate compatible with the processing
capabilities of the client.
